P.I.N: SA03.0000453889

**Doctor:** EDHE091260 - ABDULAZIZ ALABDULAALY

**Visited:** 14-Jun-2021 8:13:13 am

Patient Name: EID, ABDULLAH RIYAD

Sex: Male

Nationality: SAUDI

Birth Date: 26-Feb-1999

Marital Status: Single

Age: 22 Year(s)

## CHEIF COMPLAINTS:

22 male referred for DVT. had history of left leg DVT (CI, EI, CF, PSF) veins, doppler on 26/12/19 and repeated on 17/8/20, showed persistent thrombosis. Patient had gastric ligation and travel before the DVT. Lupus anticoagulant positive, factor V heterozygous, but not specified since the report is merely 3 sentences. No symptoms of swelling or pain. Patient is on apixaban 5 mg bid.

Assessment and plan;

extensive DVT with heterozygous factor V and lupus anticoagulant, was on apixaban. Need to repeat testing for lupus anticoagulants/ doppler for left side, and if still thrombosis need to switch to warfarin rather than any of the direct oral anticoagulants.

## HISTORY:

## VITAL SIGNS:

- Temperature:
- Respiration:
- Pulse:
- SPO2:
- Systolic:
- Diastolic:

## PHYSICAL EXAMINATION

## ADVISED INVESTIGATIONS:

- CBC WITH AUTOMATED DIFF.
- ANA (ANTI-NUCLEAR ABS)
- CARDIOLIPIN ABS (ACA)
- LUPUS ANTICOAGULANT
- ULTRASOUND DOPPLER FOR PERIPHERAL VEINS ONE SIDE
- BETA-2-GLYCOPROTEIN ABS.

## DIAGNOSIS:

### PROVISIONAL:

- I82.8 - Embolism and thrombosis of other specified veins

### FINAL:

| Generic  | Medicine             | Dose | RouteADM | Frequency | Duration |
|----------|----------------------|------|----------|-----------|----------|
