

Aljazeera Cardiac Center (ACC)  
Exercise Stress Echocardiography Report

Name: Walied Mostafa Mohamad Zain

MRN: 624256

Age: 42

Study Date: 07-09-2021

Referring: OPD

History and reason for study: Chest pain, SOB, Palpitation

SUMMARY:

- **Resting data (baseline )**
  - ECG : Normal
  - BP : normal
  - Symptoms: non
  - Echo: no regional wall motion abnormalities.
- **At Peak exercise, Target Heart Rate reached (patient achieved 12 MET's)**
  - ECG : No new changes
  - BP response: normal
  - Symptoms: non
  - Echo: no regional wall motion abnormalities

CONCLUSION:

- Negative exercise stress echo test for ischemia
