

File No. :1392654 Age : 29 Y/ 11 M/ 1 D Gender :Male
 Patient Name E :Abdullah Hamud Alhumoad Nationality :Saudi
 Patient Name A : عبدالله حمود الحمود Order No :29582938
 Doctor Name : 3 Patient Location :General Lab Order Date :03-04-2023 01:48
 Financial Cat. :2 - Cash Patient Pregnant :No

Lab. Section :**Molecular & Genetics** Collection Date : 03-04-2023 02:36
 Technician : -45374 - Reeman Hassan Receive Date :03-04-2023 02:55

Reviewed & approved by Dr. : 21452 - Abdulkareem Fahad Ali Alhethel Pt Result Date : 03-04-2023 03:14

Test Name	Result	Unit	Reference Ranges
SARS-CoV-2 Rapid Antigen Test (RAT)	POSITIVE	.	NEGATIVE

SARS-CoV-2 Rapid Antigen Test (RAT) Test result should not be used as the sole criteria for the diagnosis of SARs-COV-2 infections and based on CDC recommendation.

A negative result may occur if the concentration of antigen in a sample is below the detection limit of the test or if the sample was collected or transported improperly. Therefore a negative test result does not eliminate the possibility of SARS-CoV-2 infection and should be confirmed by a molecular assay if necessary for patient management.
